If this program isn't working correctly on this version of Windows, try running the compatibility troubleshooter.

[Run compatibility troubleshooter]

How do I choose compatibility settings manually?

Compatibility mode

☐ Run this program in compatibility mode for:

Windows 8

Settings

☐ Reduced color mode

8-bit (256) color

☐ Run in 640 x 480 screen resolution

☐ Disable fullscreen optimizations

☐ Run this program as an administrator

☐ Register this program for restart

[Change high DPI settings]   **6**

[🛡 Change settings for all users]

[OK] [Cancel] [Apply]

---

terminal.exe Properties   **7**

Choose the high DPI settings for this app.

Application DPI

☑ Override system DPI   **8**

Windows reports an unchaging DPI to legacy applications, which is set when the user first logs in to Windows. This can result in blurry applications if the DPI of the main monitor changes while the user is logged in.

This override setting will allow Windows to instead report the current DPI of the main monitor when the application starts.
